## DZ47s Miniature circuit breaker

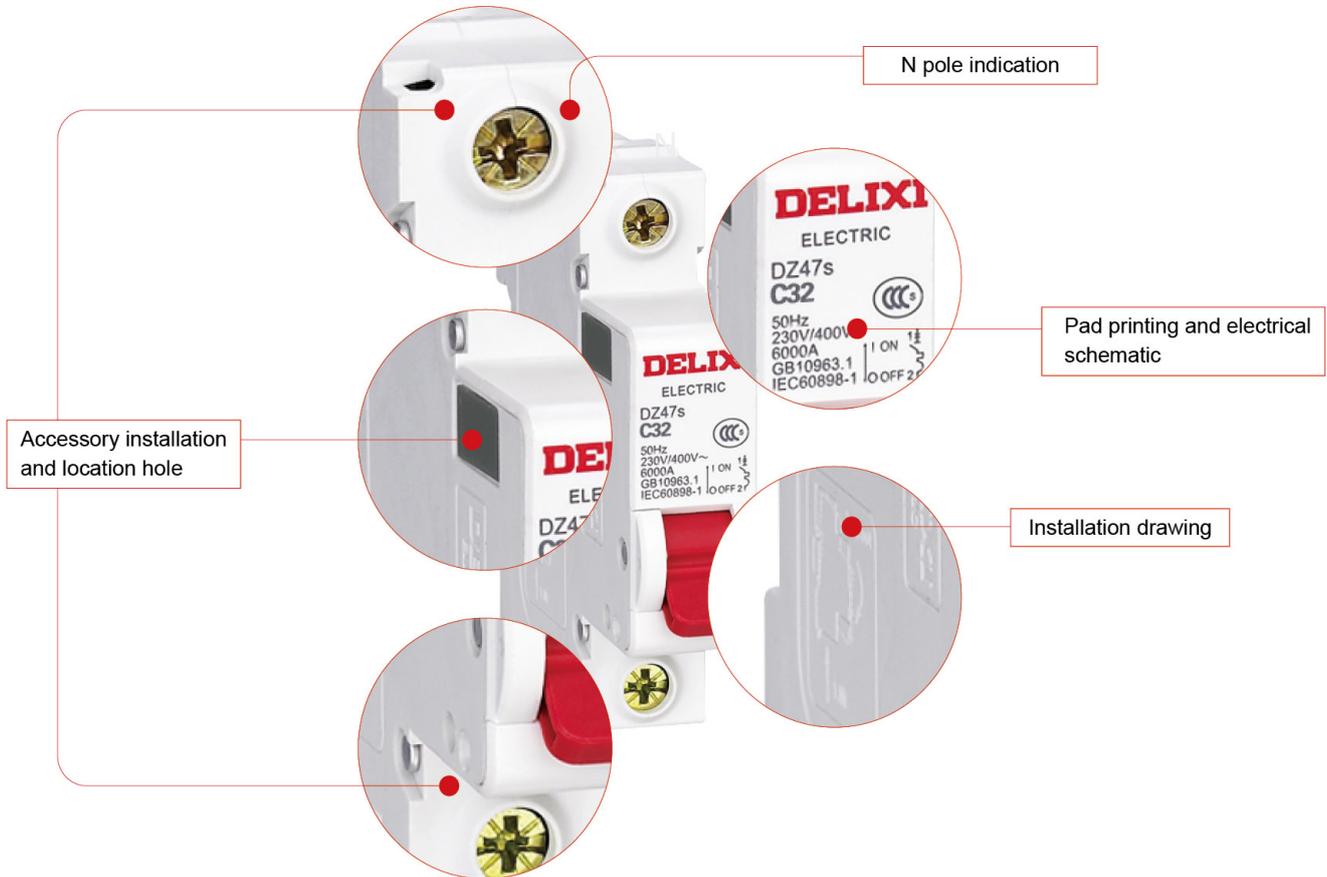

DZ47s miniature circuit breaker has the following functions:

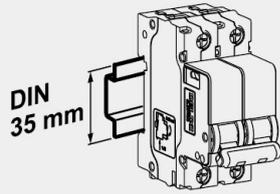

- Short-circuit protection
- Over-load protection
- Isolation protection

### Specification

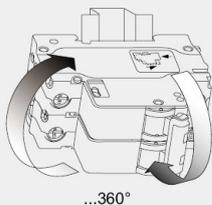

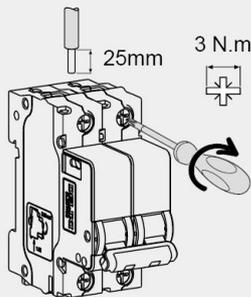

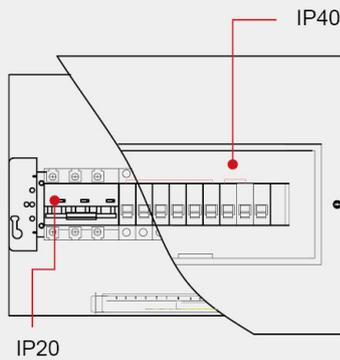

Rated working voltage (V)	1P: 230/400 AC
	1P+N: 230 AC
	2P,3P,3P+N,4P: 400 AC
Rated current(A)	1-63
Frequency (Hz)	50/60
Poles	1P,1P+N,2P,3P,3P+N,4P
Breaking capacity (kA)	6

### Product Details Showing

Mounted on 35mm standard Din-rail

Flexible installation direction

## Electrical Characteristics

Rated insulation voltage (Ui)	250(phase to earth) / 500(phase to phase)	
Maximum operating voltage $U_{Bmax}$	1P,1P+N (V)	230/400 AC
	2P,3P,4P,3P+N (V)	400 AC
	1P (V)	60 DC
Rated capacity of short-circuit	$I_{cn}$ (IEC/EN60898) (kA)	6
Rated impulse withstand voltage	$U_{imp}(1.2/50)$ (kV)	4
Dielectric test voltage	2kV(50/60HZ,1mins)	
Use category	A	
Isolation function	YES	
Pollution degree	2	
Tripping type	Thermal magnetic tripping	
Characteristic of Thermal-Magnetic Tripping	B Curve(3In~5In)	■
	C Curve(5In~10In)	■
	D Curve(10In~14In)	■
Electrical and mechanical accessories	■	

## Mechanical Characteristics

Handle	Red, pad printing indication ON-OFF position	
Machanical life	times	20000
Electrical life	times	10000
Protection degree	Installed in distribution box	IP40
	Installed directly	IP20
Mechanical shock resistance	30g, 3 times shock, duration 11ms (No significant vibration and shock place)	
Anti-vibration (IEC/EN 60068-2-6)	(No significant vibration and shock place)	
Damp and hot resistance (IEC 60068-2)	2 type 28 cycles	
Damp and hot °C /RH	Temp. 55 °C Humidity 90%~96% Temp. 25 °C Humidity 95%~100%	
Reference ambient temperature	°C	30 °C
Ambient temperature (Daily average temperature $\leq +35$ °C )	°C	-35 °C ~+70 °C
Stock Temperature	°C	-40 °C ~+85 °C

## Installation Characteristics

Terminal type	U terminal	
Maximum wiring capability	(A)	Current rating 1-63:25mm <sup>2</sup>
Maximum limit torque	(A)	Current rating 1-63:2.5 N.m
Tool	Crosshead or flathead screwdriver	
Installation	Mounted on standard DIN rail (35mm)	
Incoming type	Top or bottom	

## Order Guide Order Selection and Code

## Installation Dimensions

## Accessories

### Remote indication accessories

- OF Auxiliary contact
  - External circuit, indicating the status of the circuit breaker
  - Basic form of the auxiliary contact: 1 NO, 1 NC
  - Wiring ability: 1-2.5mm<sup>2</sup>

- SD Alarm contact
  - Signal when the circuit breaker fault trips
  - Mechanical indication on the front panel to indicate fault tripping
  - Basic form of the auxiliary contact: 1 NO, 1 NC
  - Wiring ability: 1-2.5mm<sup>2</sup>

### Trip accessories

- MX+OF Shunt release
  - External circuit, indicating the status of the circuit breaker
  - When the signal is obtained, the circuit breaker trips.
  - Basic form of the auxiliary contact: 1 NO, 1 NC
  - Wiring ability: 1-2.5mm<sup>2</sup>

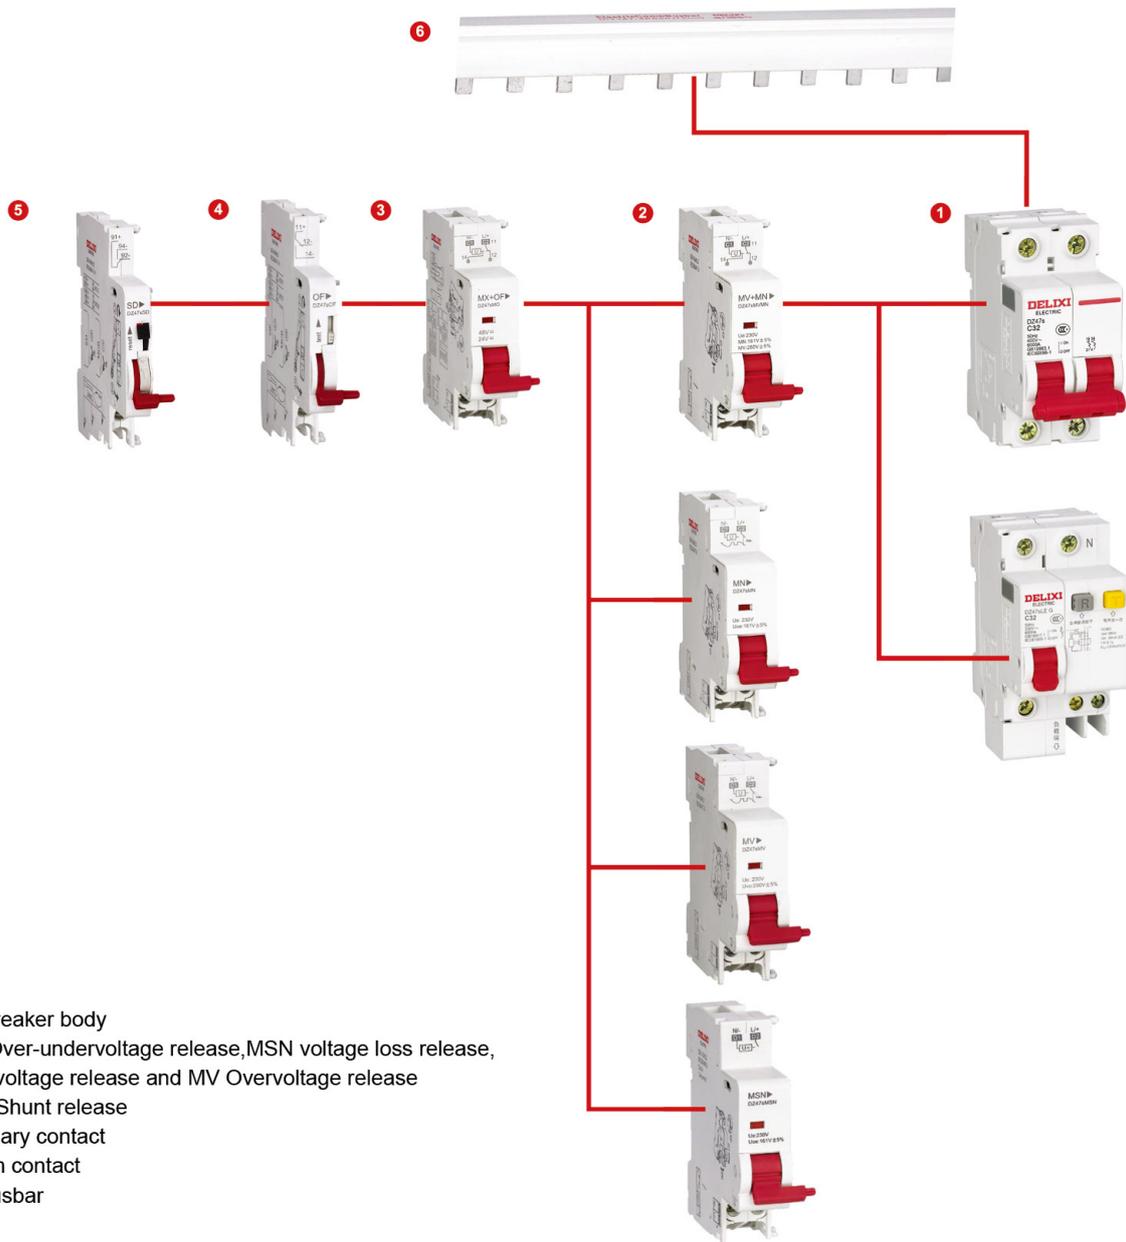

- MV Overvoltage release
  - Protection against line overvoltage faults
  - When the voltage across the trip unit rises to the rated range, the circuit breaker trips.
  - There is a fault trip indication on the front panel, and the indicator pops up for overvoltage tripping.
  - Rated working trip overvoltage: (280±14)V AC
  - Wiring ability: 1-2.5mm<sup>2</sup>

- MN Undervoltage release
  - Protection against line undervoltage faults
  - When the voltage across the trip unit drops to the rated range, the circuit breaker trips.
  - There is a fault trip indication on the front panel, and the indicator pops up for undervoltage tripping.
  - Rated working trip undervoltage: (161±8.05) VAC, undervoltage protection interval is (35%~70%)U<sub>e</sub>
  - Wiring ability: 1-2.5mm<sup>2</sup>

- MVMN Over-undervoltage release
  - Protection against line overvoltage and undervoltage
  - When the voltage across the trip unit rises or falls to the rated range, the circuit breaker trips.
  - There is a fault trip indication on the front panel, and the indicator pops up for overvoltage or undervoltage tripping.
  - Rated working trip overvoltage: (280±14) V AC, rated working trip undervoltage: (161±8.05)V AC, undervoltage protection interval is (35%~70%)U<sub>e</sub>
  - Wiring ability: 1-2.5mm<sup>2</sup>

- MSN Voltage loss release
  - When the supply voltage drops within the rated range, the circuit breaker trips to realize the undervoltage protection of the line;
  - When the power supply voltage returns to normal, ensure that the circuit breaker is normally closed.
  - Prevent the circuit breaker from reclosing when the supply voltage is zero or falls within the rated range.
  - There is a fault trip indication on the front panel, and the indicator pops up for under voltage tripping.
  - Rated working trip undervoltage: (161±8.05)V AC, undervoltage protection interval (35%~70%)U<sub>e</sub>
  - Normal recovery voltage ( ≥ 85%U<sub>e</sub>), Voltage loss protection interval (<35%U<sub>e</sub>)
  - Wiring ability: 1-2.5mm<sup>2</sup>

## Accessory installation diagram

- 1.Circuit breaker body
- 2.MVMN Over-undervoltage release,MSN voltage loss release, MN Undervoltage release and MV Overvoltage release
- 3.MX+OF Shunt release
- 4.OF Auxiliary contact
- 5.SD Alarm contact
- 6.Comb busbar

## Assembly instructions

1. Accessory tool-free installation, installation location on the left side of the circuit breaker
- 2.The total width of the accessories assembled within 54mm, from left to right in order and number:OF,SD(3 max.)+MO,MSN,MV,MN,MVMN(2max.)+MCB.
- 3.Accessories are common to DZ47s,DZ47sLE,DZ47P,DZ47PLE

## Accessories Introduction

## Tripping characteristics

### B type

B tripping characteristics miniature circuit breakers comply with the GB 10963.1 IEC60898 standard and are suitable for protecting resistive loads or loads without inrush current.

### C type

C tripping characteristics miniature circuit breakers comply with GB 10963.1 IEC60898 standard and are suitable for protecting inductive loads with resistive loads or low inrush current.

### D type

D tripping characteristics miniature circuit breaker complies with the GB 10963.1 IEC60898 standard and is suitable for protecting loads with high inrush current when the line is connected.

Trip type	Standard	Thermal tripping characteristics				Electromagnetic tripping characteristics			
		Test current	Test time	Starting state	Result	Test current AC	Test time	Starting state	Result
B	IEC60898 GB10963	1.13I <sub>n</sub>	>1h	Cold	No trip	3I <sub>n</sub>	>0.1s	Cold	No trip
		1.45I <sub>n</sub>	<1h	Hot	Trip	5I <sub>n</sub>	<0.1s		Trip
C	IEC60898 GB10963	1.13I <sub>n</sub>	≥ 1h (≤ 63A) ≥ 2h (>63A)	Cold	No trip	5I <sub>n</sub>	≥ 0.1s		No trip
		1.45I <sub>n</sub>	<1h (≤ 63A) <2h (>63A)	Hot	Trip	10I <sub>n</sub>	<0.1s		Trip
D	IEC60898 GB10963	1.13I <sub>n</sub>	≥ 1h	Cold	No trip	10I <sub>n</sub>	≥ 0.1s		No trip
		1.45I <sub>n</sub>	<1h	Hot	Trip	20I <sub>n</sub>	<0.1s		Trip

## Tripping curve
